

# MSc in Psychology

University of Roehampton, London Online

**93%**

of students say the academic rigour of their programme is as good as or better than they expected\*

**92%**

of students say that shared learning opportunities with other students are as good as or better than they expected\*

**2 out of 3**

students have seen a career improvement since starting their programme\*

\* Results calculated by the University of Roehampton, London Online based on the responses of 676 current students who responded to the annual student satisfaction survey in 2014. At the time the research was fielded, this was a response rate of 33%.

## Aspire. Achieve. Advance.

Develop critical skills that will help you to apply the science of psychology in real-world scenarios. You will have the opportunity to practise core theories in context via scientific experiments and activities, and will cultivate your own research skills to use in any workplace or relationship.

Learn how to deal with the challenges associated with the self, identity, and culture in complex environments to make a difference in your life, as well as others'.

As a Roehampton Online student, you will have the opportunity to:

- Develop skills relevant to career advancement
- Gain insights from a diverse student population
- Increase your confidence
- Develop a social network within the university, helping you stay motivated
- Identify career goals and track your progress
- Establish lasting professional relationships
- Manage your studies on your schedule

*The group interactions are interesting and fun, and the course is well organised so that I am encouraged to complete work every two weeks for assessment and feedback.*

**Paula Barnes**  
United Kingdom

## Why choose this programme?

Interact with other students in a range of experiments and activities that deepen an understanding of psychology theory and research.

Evaluate cognitive, developmental and biological theories in the context of self, identity, culture, relationships and the workplace.

Apply principles in experimental activities like simulating NASA moon tasks, administering psychometric tests or reducing workplace absenteeism.

Develop qualitative and quantitative research skills to conduct an evaluation of a real-world issue for the final research project.

## The Roehampton difference

You'll be earning your degree from a British university that has a proud 175-year history of providing quality education through its four colleges.

Each of our online masters programmes has been carefully developed by academics and subject-matter experts to reflect contemporary industry trends and help prepare you to solve real-life problems.

### Optimal class sizes

Classes maximise time and interaction with faculty members and students in a diverse classroom.

### Faculty interaction

Faculty members guide students through activities and provide formative feedback.

### Academic material

All required materials for each module are provided in the classroom.

### Student community

Programmes are centred on the wider student body, so you can build a broader professional network.
